Projects

DevConnect | *MongoDb, ExpressJs, ReactJs, NodeJs, Tailwind CSS, Websocket* [Link](#)

Jan, 2025

- Built a social networking platform for developers from various tech domains to connect, collaborate, and share knowledge using MongoDB, ExpressJs, ReactJs, and NodeJs. It has a responsive, user-friendly UI with Tailwind CSS, focusing on seamless user experience across devices.
- Integrated Stripe payment gateway for premium membership subscriptions, user will get a verification badge after Silver or Gold Membership.
- Implemented real-time chat functionality using WebSocket (Socket.io) to allow instant messaging between users, designed and developed secure and scalable RESTful APIs for user authentication, profile management, post handling, and messaging.

Netflix-Gemini | *HTML, CSS, JavaScript, React, Redux, Tailwind CSS* [Link](#)

September, 2024

- Streamlined a React-based web application, replicating the core functionalities and user interface of Netflix, with a focus on performance and user experience.
- Integrated Gemini for advanced movie suggestions, utilizing user queries and RESTful API integration to deliver personalized recommendations.
- Implemented dynamic routing and state management using React Router and Redux to ensure seamless navigation and real-time data updates across the platform.

NewsHub | *HTML, CSS, JavaScript, React, Bootstrap* [Link](#)

August, 2024

- 'NewsHub' is a dynamic and feature-rich React-based news application designed to keep users informed and engaged, featuring an intuitive and responsive UI for enhanced user experience.
- Provides a wide range of news articles categorized into multiple sections, ensuring organized content delivery and seamless navigation.
- Integrated real-time news updates using RESTful APIs to deliver the latest headlines and breaking news efficiently.

ToDo App | *HTML, CSS, JavaScript, React, Tailwind CSS* [Link](#)

April, 2024

- A minimalist and efficient ToDo App built with React, enabling users to add, manage, and delete tasks, with persistent data storage using browser local storage.
- Includes an automatic Dark Mode feature that activates post 5:00 PM to enhance user experience based on time of day.
- Implements responsive and user-friendly UI to ensure smooth task management across devices.

Amazon Clone | *HTML, CSS* [Link](#)

February, 2024

- Developed an Amazon website clone as a practice project to strengthen and demonstrate proficiency in HTML and CSS, focusing on replicating the layout, design, and responsiveness of the original platform.
- Aimed at understanding the structural and design aspects of a modern e-commerce website, enhancing front-end development skills through real-world interface replication.
- Emphasized responsive design principles to ensure optimal user experience across various devices and screen sizes.

Technical Skills

Languages: HTML, Javascript, C, C++

Frameworks/Libraries: ReactJs, NodeJs, Redux, MongoDB, ExpressJs, Tailwind CSS

Developer Tools: Visual Studio Code

Others: Data Structures and Algorithm
